

e-daptor™

Export billing data to your accounting system in one easy step!

Hassle-Free Data Transfer

With e-daptor, users of HME billing systems can now access more timely and complete financial information by importing transaction data directly into their accounting system, with minimal intervention.

Through the e-daptor web console, your accounting staff can quickly access a pre-formatted file containing your data. A single click exports the file directly into your system. Minimal posting exceptions can be easily corrected by your staff. Choose between automatic or manual updates, and post in summary or detail formats.

When and Where You Need It

Leverage your HME billing system with e-daptor today, to give yourself the benefits of on-demand financial information in your accounting system.

KEY FEATURES
